

Data Governance Software for the Federal Government

About Us

ActiveNav is the data privacy and governance software provider. With ActiveNav federal agencies and public sector entities can map, clean, classify, quarantine and delete sensitive, redundant, obsolete and trivial data. ActiveNav is headquartered in the DC metro area and has offices in Europe and Australia.

- ▶ We support a wide range of contract vehicles including:
 - GSA Multiple Award Schedule IT 70
 - ARMY CHESSE ITES-SW
 - Blanket Purchase Agreements
 - DOD ESI Agreements
 - NASA SEWP V
 - OTA
- ▶ Priced per TB or PB (unlimited users)
 - ACTIVE-Inventory
 - ACTIVE-Compliance
 - ACTIVE-Governance

Why ActiveNav?

Our software minimizes risk by helping federal agencies understand and manage their vast stores of unstructured data - the unmanaged 80%.

- ▶ Automatically create and maintain a data inventory to comply with records management regulations such as M-19-21
- ▶ Auto-categorize files against records retention schedules and manage data in line with policies
- ▶ Identify and quarantine insecure and inappropriately stored passwords, PII, PHI, CUI and other sensitive information
- ▶ Reduce time and cost of cloud migrations

References

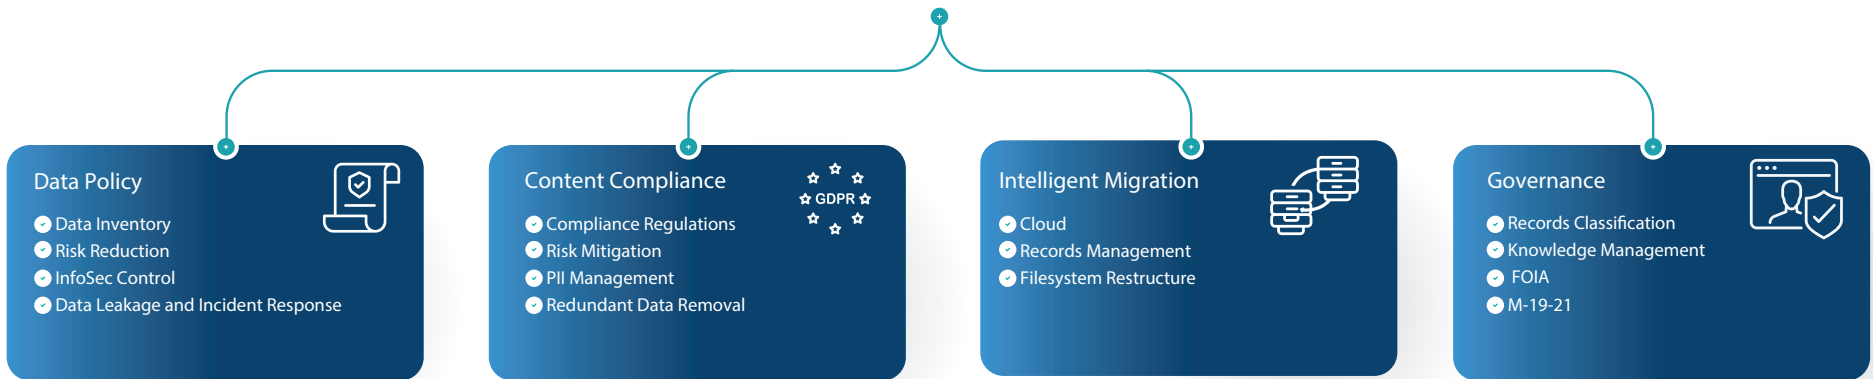

We have extensive experience working with federal agencies including:

- ▶ U.S. Marine Corps
- ▶ U.S. Army
- ▶ U.S. Cyber Command
- ▶ The Department of Homeland Security
